

## SOME TRUTH'S ABOUT CANCER! Is there a Natural Solution?

Disclaimer: *The following article does not make any claims as to a specific cure for disease, rather it identifies the components of the Human body that function to keep the body healthy and to self heal. Any Curing of disease must be a normal function of the body, operating within its intended design, that brings about restoration of Natural balance of its organs and functions.*

There are so many opinions as to what cancer is, where it comes from and how to overcome it, that I believe it is time to look for some truth in the facts.

The Experts who attempt to explain Cancer, basically “Connect the dots” of many known characteristics of cancer, and then fabricate a story to explain it. Each has their own opinion to explain their “modality” to treat Cancer. This is a little like an archeologist finding some bones and then imagining his own representation of what the Ancient beast looked like. He then feeds on his own imagination and creates a complete scenario explaining the life history and living conditions of the beast.

LET US ESTABLISH JUST A FEW COMMONLY HELD BELIEFS.

1. **Free Radical Damage** is the catalyst that starts cancer.
2. Cancer cells are normal cells that have had damage to their DNA. (Free Radical damage)
3. Cancer cannot thrive in an **Alkaline body**. (Dr. Otto Warburg- Nobel prize for discovering Calcium (alkaline mineral) cures cancer circa 1935)
4. Other so called experts add things, like it is the function of the “**Immune System**” to overcome cancer. Interestingly, if one understands what is implied by “The Immune System” then I believe that this statement is correct. Since the Immune System is a PROCESS of the various parts of the body, IT CAN BE FIXED! Unfortunately, no one actually attempts to go beyond the vague statement, explaining HOW it functions.
5. Here are a few excerpts from various people offering “Cancer Treatments.”
  - a. Example: An organization called “Alternative Cancer Treatments” suggests that there is some balance between **Cancer Cells** and the **Immune system**. Hogwash! There is no such thing as a preexisting cancer cell waiting to get an opportunity to grow! There are only normal cells that **become Cancerous** by having their DNA damaged. As far as an Immune system, this is a function of all systems working together. We can define a muscular system, a cardiovascular system, a digestive system, a skeletal system, a nervous system, a lymphatic system, etc. BUT, there is no definition of a specific “**Immune System**.” The Immune system is a **process** of all of the body’s other systems working in balance. It is not an isolated system within the body. This is another example of how the Medical world uses names to vaguely identify a **process** in order to treat its symptoms. Consider the disease “Fibromyalgia” this is general pain with no known cause or cure. But because it has been given a name, it can be treated and charged to medical insurance. (Incidentally, the information in the latter part of this article applies to this condition. Relief is almost immediate)
  - b. One source states that “**Natural** cancer treatments gently kill cancer cells”, “strengthen the Immune system”, and then fix the “Inner Terrain” of the body. You can’t get any more vague than this mumbo jumbo!  
(*Cancer cells are dying cells already, see below*)

c. One group "Identifies" the Lymphatic system as the issue. They state:

*"Alternative and conventional physicians alike readily acknowledge that one of the most important keys to health is an optimally functioning immune system."*

*The **lymphatic system** is often overlooked as an essential component of immune function. It is a network of vessels and lymph nodes that runs throughout the body, transporting lymph fluids and eliminating toxins.*

***Affecting every cell and organ in the body, the lymphatic system is the terrain in which the immune system functions. It serves as a primary cleansing and filtration system, and helps maintain homeostasis, the body's innate mechanism of self-regulation.***

*(Having declared the statement above they now suggest the use of a specific piece of equipment)*

*With Derma-Ray The cold laser high frequency light system Lymphatic Detox Therapy... Lymphatic functions include transporting nutrients and oxygen to the cell and tissues, removing protein waste and other waste matter (including environmental toxins) from the cells and the body's interstitial ("in-between") regions, maintaining fluid balance in the connective tissue, and transporting fatty acids from the small intestine to the liver for storage and later use **(THEY JUST DESCRIBED THE FUNCTION OF THE BLOOD, NOT THE LYMPHATIC SYSTEM!)***

*When the lymphatic system **(BLOOD)** becomes congested, these functions are impaired, depriving cells of oxygen and affecting the ability of the body to rid itself of its own waste material. Over time, other body systems that rely on the lymphatic system **(BLOOD)** for waste removal will also become compromised, setting the stage for pain and disease. A sure sign of lymph **(BLOOD)** congestion is sore or swollen lymph glands, which are most noticeable in the neck, armpits, groins, and intestines. But illness as wide-ranging as allergies, fibrocystic disease (non-malignant fibrous growths), and cancer can be related to lymph **(BLOOD)** congestion.*

*Practitioners of alternative medicine often use diet, herbs, homeopathic remedies, sauna, and manual lymphatic massage to prevent or reverse lymph congestion, all of which have proven effective in stimulating the flow of lymph **(BLOOD)** to some degree. While lymph massage helps to drain the lymphatic system and is well received by most patients, inexperienced therapists can aggravate a patient's condition by pushing the material to other areas of congestion.*

## **THE REAL SYSTEM THAT ACCOMPLISHES ALL THAT IS STATED ABOVE *IS THE BLOOD SYSTEM!***

**Let's get real and discover what cancer is, what causes it and what cures it.**

**First let's list some very basic facts.** When the body is functioning properly, all systems are in Balance, naturally.

- 1. God created the body to heal itself! From the first cell division at birth, DNA guides the formation and renewal of all cells! THE BODY HEALS ITSELF!**
- 2. Life is in the Blood! Lev. 11:17 (Holy Bible)**
  - a. **Blood is 92-95% water. (science)**
  - b. **Red Blood cells carry Oxygen from the Lungs to every cell.**
    - i. **products that claim they are "Oxygenated" are promoting that their water is missing Hydrogen completeness and exhibit high oxidizing and aging properties.**
    - ii. **We get oxygen from the lungs via the blood, not from water! Unlike fish, we do not have "Gills" to extract oxygen from water.**
  - c. **Red Blood cells carry nutrition to the cells**
  - d. **Red Blood cells carry waste from the cells to:**
    - i. **Kidneys and bladder for processing out of the body**
    - ii. **The overload of the kidneys processing remains in the blood and is carried to the lungs for expiration.**
    - iii. **That which the kidneys and lungs cannot discharge is carried to the LYMPH system to be forced out through the skin.**
- 3. There is no such thing as a "Cancer Cell", all cells are controlled by DNA in development. The cells function is in the DNA and develops from birth. New Cells ALWAYS follow the Genetic DNA code. (Cancerous cells are mutated normal cells)**
- 4. Every Cell is a battery! New Cells begin providing 70-90 mV of electrical charge. The body runs on electricity. Every muscle movement, every nerves signal delivery, every thought is an electrical action.**

Blood is the circulating source of Life and Energy to the body. Consider having a precision automobile with all mechanical parts perfectly functioning, BUT trying to run it on kerosene or water instead of High Octane Fuel. The Fuel is the source for making all of the other parts perform as designed. **THE BLOOD IS THE FUEL DELIVERY SYSTEM OF THE BODY!**

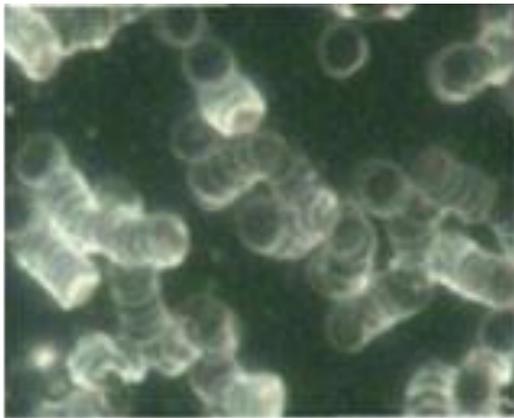

1. It carries the Oxygen from the lungs to the cells for oxidative combustion energy.
2. It carries nutrition to the cells as the fuel source.
3. It extracts the waste byproduct of life (toxic acidic residue) from the cells and carries it out to the kidneys for discharge, or the lungs and/or lymph system (see above)
4. It carries Carbon Dioxide back to the lungs and exchanges it for Oxygen.
5. Its condition determines the vibrancy of health or source of disease and digression of health in the body.

It is commonly recognized that an Acidic Body is the source of all disease manifestation! But the normal perception is that the solution is to ALKALIZE the body. Somehow they conclude that adding some alkaline product to the stomach will NEUTRALIZE its acidity.

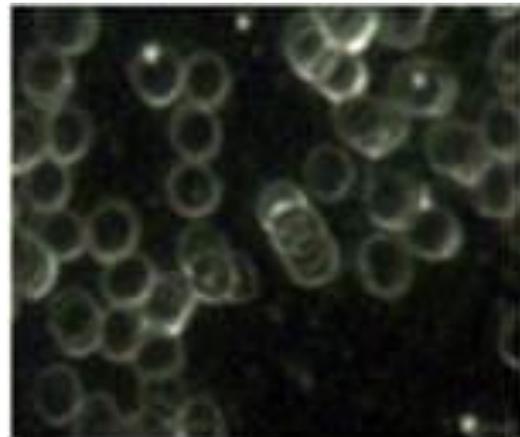

**Quite to the contrary, The solution to making the body alkaline is to REMOVE the acid, not neutralize it.**

What part of the body is Acidic? The 70+ trillion cells of the body that are retaining the acidic byproduct of cellular combustion (utilization of nutrition to produce energy). Acidic cells are a result of the Blood NOT BEING CAPABLE of removing the waste toxins and carrying the waste to the Kidneys.

WHY DOES THIS HAPPEN? Because the Blood is dehydrated! View the blood of an average American person on a normal American diet. Using “Bright-field Microscopy” of live blood samples, we typically see 80+% of the Red Blood cells deflated, stuck together in stacks of flat cells. This condition has been given the medical name of “Rouleau” a fancy way of saying “Unusable Red Blood cells” acting as sludge and debris in the river of life. (Note: *rouleau* are stacks of red blood cells. (RBCs))

**Live Red Blood Cells:**  
Rouleau Cells stacked together.  
Limits the surface area of cells.  
Limiting Nutrients/Oxygen  
exchange.

**Live Red Blood Cells**  
10 minutes after drinking Hexagonal water.  
Separation of cells creates Capacity for greater  
Oxygen uptake & more efficient nutrient utilization.

When the Blood cannot adequately deliver oxygen and nutrition to the cells and remove the toxic waste, then the waste accumulates. The residue of cellular energy production is ACIDIC waste by definition. The stored waste causes our Cells to become acidic. Weak, acidic cells create an opportunity for dysfunctional performance of the body’s organs. We call these dysfunctional conditions “Disease” and treat the symptoms, not the source. Such issues as Diabetes, Obesity, Digestive problems are the **Manifestation** of a failure of process, not a disease. Conditions can be reversed through restoration of the process.

Let's get back to our discussion on "Cancer." Based on the information above, let's explore WHAT cancer is.

First, as shown above, the blood system is not capable of delivering adequate nutrition, nor oxygen service to or waste removal from the cells. In this condition the cells energy production drops. This depletion of energy production is from the lack of sufficient Oxygen and nutrition and accumulation of retained waste. As we age our Cells electrical charge reduces from their original 70-90 mV to a weak 20-30 mV charge. This truly fits the description of "Tired Blood." FAILURE OF OUR BODY PERFORMANCE is largely due to insufficient Oxygen delivery and toxic buildup which is seen as tiredness, discomfort, overweight, things we then tag as Diseases.

When Cells are at this weakened energy level they are subject to DNA damage by Free Radicals. A free radical is any molecular structure that is LACKING an electron. The most available electron is usually a *Hydrogen molecule*. As the Free Radical passes a cell whose charge is less than 20 mV, it snatches a Hydrogen molecule from the DUPLEX HYDROGEN LOCK that maintains the security of the DNA. This causes the DNA to be altered.

Now that the Free Radical has received the Electron it needed it is no longer a threat. BUT since it stole a Hydrogen Molecule from the weak cell, that cell has now become a "CANCEROUS CELL" with a "Free Radical electrical charge." This damaged cell needs to re-acquire an electron to relock its now damaged DNA code. The damaged cell is now a "Cancerous Cell." There are not many "TYPES" of Cancer; instead there are many types of "CELLS THAT BECOME CANCEROUS!"

The Cancerous Cell is an altered condition of a normal cell who has had its DNA damaged and has been left as a Free Radical amongst other weakened cells. It cannot CREATE a new cell in its image. It is now a dying cell. It is in a process of degeneration. However, it can steal a Hydrogen Molecule from a weak neighbor cell to restore the lock on its own damaged Code! It is now passing the damage on to weaker cells. These cells progressively destroy a healthy organ unless the normal cells are Re Energized sufficiently to repel the attack of the Free Radicals.

**Cancer is a degenerative process of weakened cells preying on other weakened cells, destroying their reproductive DNA. All cancer cells are dying** and will go away if you can stop their ability to prey on normal cells by restoring the energy to the surrounding cells.

The way to stop this process is to **provide the restoration of the function of the Blood.**

1. Providing adequate oxygen delivery, nutrition delivery and restored blood flow will cause the weakened cells to Recharge to a level that they cannot be damaged by free radicals. They can defend themselves against Free Radical presence once again.
2. Proper Blood formation, with healthy individual Red blood cells, functions as the delivery system of the body. Red Blood Cells (RBC) carry Oxygen from the lungs and Nutrition from the digestive system to the cells and take the waste byproducts and carbon dioxide away.
3. The Acidic condition of the cells is reduced through **REMOVAL of the acid waste!** The removal is the result of restoring the PROCESS back to normal function. Alkalizing the

body is not accomplished by adding more chemicals (alkalizing minerals), but by removal of the individual cells acidic waste, restoring its natural balance.

### **So, the real question is HOW do we restore the blood?**

Brightfield Microscopy is a proven method of taking a live blood sample on a glass slide and viewing with a Video Microscope. This allows the professional to analyze the condition of the blood. There are many patterns that represent a blood condition that correlates to a specific disease manifestation. The use of BrightField Microscopy of live blood can be used to show the result of a person drinking RESTRICTED HEXAGONAL (restored to nature) water. The weakened blood cells show functional restoration in less than 15 minutes. Instead of being flattened, stuck together in the “Rouleau” condition, they become spherical, energized and separated. They now can once again function as the vehicle for delivery of Oxygen, Nutrition and Energy !

What is the water **RESTRICTED** back to? It is restored to the condition it was in nature before it began dissolving minerals, or having chemicals, chlorine, fluoride added. Any potable drinking water can be filtered of its impurities and then processed through a powerful ionizer. The Ionizer system divides the water into two flows and separates the Hydrogen molecules from the waste water, adding it to the drinking water. This Hydrogen carries a negative electrical charge and naturally seeks to recombine with the positively charged damaged water molecules. The recombining of the Hydrogen Molecules to the incomplete water molecules removes their positive (acidic) charge. This rebalancing of the water molecules restores them back to what they were in nature.

In Nature you can see the physical properties of water by examining the Snowflake. Every Snowflake, though unique in design is always in the shape of a hexagon. You will see this six sided structure in EVERY SNOWFLAKE ! Water at its purest is always forming Hexagonal crystal structures in snowflakes. This is the natural **geometric structure of pure water**. If there were any impurities, minerals, etc. in the water, a snowflake could not form in uniform 6 sided crystals. Properly ionized water ALWAYS forms structures of 6 molecules, not 4-7 as some internet guru’s claim. There is purpose to the design, not just smaller structures. **The Specific Natural Design is the indication of the solution!**

A Water Ionizer must have sufficient power and contact exposure to the incoming water flow in order to extract the negative Hydrogen ions. These Negative Hydrogen Ions are added to the drinking water. Initially, this Negative charge is readily available as “Anti-Oxidants.” They also recombine with the source water, repairing it. The water then forms into Micro Clusters of six water molecules as Hexagonal rings. This Hexagonal is the smallest form of structured water, duplicating original water. This Hexagonal form is the size and shape that the body can absorb in the mouth, the esophageal channel and stomach. The right water does not process through the stomach and intestinal tract; it is absorbed into the blood stream immediately. This PROCESS then ACTIVATES the Red Blood cells.

Healthy Blood is the delivery system of the body. It provides what the body needs to restore cellular health and heal itself. It does so by restoring the energy levels and performance of the body’s cells. This allows healthy cells to be able to resist free radical attacks. The damaged cells that we call Cancerous cells cannot reproduce, but propagate through degeneration other weak cells and in the presence of restored cellular energy, will naturally expire and be carried off as waste.

#### **COMPARISON OF METHODS**

All Medical and Alternative processes attempt to resolve Cancer issues by adding some external technique to somehow kill “Dying” cells. They inject chemicals, radiate, massage, give concoctions and subject the body to external activities in the name of KILLING Cancer.

**The most noninvasive and passive approach to restoration of a condition caused by lowered energy of the body’s cells is to restore the function of the Blood.**

This can be seen in the pictures below, or in videos of people who have drunk 4-8 ounces of this amazing natural water and were retested after just 12-15 minutes.

Click here to  
<[see short video](#)>  
***“The effect of Kangen water on the Blood”***

The most important issue to consider is that **water does not interfere with any other treatment**. The body must have 6-8 glasses of water a day to be healthy. There must be adequate water to flush out the expended residue of synthetic chemicals that medical science is using in their treatment methods. And the least it will do is restore the body’s natural capability to eliminate the waste and restore its balance of energy.

The bottom line is this:

1. **No disease can thrive in an alkaline body!**
2. Acidity is a result of waste storage of toxins in the cells and accumulated fat storage on organs from entrapping food acids in fat to protect the organs.
3. Removal of the Acid byproducts is a function of the Blood and specific organs. ie. Kidney, lungs and lymph system.
4. **REMOVAL OF ACID WASTE RESTORES NATURAL ALKALINITY TO THE BODY!**
5. a person NEEDS to drink an appropriate amount of water daily, which the body requires. You SHOULD to be drinking water that is structured and sized to be absorbed by the body and blood. Present commercial sources of bottled, filtered, flavored, mineralized, oxygenated water is uselessly processed through the stomach. It cannot permeate the body's portals to reach the blood or interstitial fluids.
  - a. Typical Bottled waters and filter systems **contain large clusters** of water molecules, having lost hydrogen through their processing. They exhibit a positive electrical charge of hundreds of millivolts. (definition of Free Radical is anything that requires negative charged ions/electrons to rebalance it) At best, they are Free Radical liquids without impurities.
  - b. Large clusters of water cannot pass through the natural channels of the body into the inner system of blood and interstitial fluids. They pass into the stomach, out through the intestines and to the bladder without ever hydrating the body.
  - c. Bottled, filtered, insufficiently ionized water all exhibit the characteristics of being "Very pure Free Radical fluids" creating more damage than good and unable to hydrate the body. And they cost thousands of dollars per year more than Ionized restored restructured alkalized filtered tap water.
6. The value of Restructured, Ionized, Alkaline water (Hexagonal water) is ranked in just that order.
  - First, Restructured Hexagonal water can be boiled, frozen, stored and it retains its restored natural ability. Note: never boil or heat any water in a microwave. It's structure is destroyed by the microwaves.
  - Secondly, Ionized is the addition of negative electrical charge or energy for the body.
  - Finally, alkaline energy (negative Hydrogen Ions) creates the stress factor that determines the depth of detoxification of the cells. 9.5 pH water releases 10 times more toxins into the blood stream than 8.5 pH water. The kidney is the gateway of waste toxin removal. The kidney can only eliminate 17,000 to 19,000 Micro-Siemens of toxicity per hour in a healthy kidney. In fact the extra ions begin the acid reduction as the toxins are carried by the blood. Note: Any toxicity put into the blood stream that the Kidney cannot process, produces renal stress and discomfort. The remaining toxicity makes the blood toxic and carries the toxins to the lungs and lymph nodes for discharge. This is a discomfort issue, *but must be regarded in people with Kidney disease. The companies that make ionizers warn not to give the alkaline water to people on Kidney dialysis without doctor supervision and approval.*

**At this point it is important to recognize that none of the foregoing has claimed that the water cures anything.**

- Instead I have stated that water is a necessity of life.
- That there is a difference in water to be considered. For simple recognition visit this <[Comparison of water](#)> video.
- God's design of the body's DNA function creates the natural reproduction of cells, as long as the body is provided the resources that it requires.
- Generally a doctor never tells you what kind of water to drink. They do not recognize the function of the proper water. This is an oversight of our scientific system that focuses on the presence of minute particles in water more than the structure of water.
- We all agree that water is essential to life of all living matter. We just do not understand WHY.
- In the recognition that water is necessary, good water should be more effective in the body than poorer water or bad water.
- If drinking the suggested water has a positive effect on the restoration of your immune function via visibly restoring the purpose of the Blood itself through hydrating activation and energy. Doesn't it make sense to simply drink the water for 30 or more days for personal discovery? Regardless what the health condition is that is troubling you, discover for yourself. Simply put, "If it helps, it can't hurt!" or as one slogan puts it
- **"Change your Water – Change your life!"<sup>TM</sup>** "

My discovery of the above information has come through studying the scientific abstracts of many researchers in Japan, Korea, and Taiwan. The results of extensive studies has brought this ERW (Electrically Reduced Water) or Ionized water to significant use in the Hospitals of Japan and elsewhere.

The apparatus that I use is certified for use in Hospitals in Japan and recognized by over 6,500 Doctors of adult diseases in Japan. Its 2.5 pH water is used to clean and disinfect the Surgery unit before operating. The surgeons rinse their hands in this water instead of soap and water prior to surgery. The water is used topically in these hospitals to eliminate MRSA at its source as well as healing the wounds of those who have contracted MRSA.

Water is FREE! It should be available to every person for life and health.

No amount of vitamins, minerals or other mixtures can cause a red blood cell to rehydrate and perform its purpose. All additives to water are considered as food and go to the stomach. This is simply a reality that the micro-cluster of 6 water molecules (Hexagonal water) is the only functional water small enough to pass through the portals of the body to reach the blood. Anything added to the water creates large clusters of hydrogen depleted water which are too large to enter these portals and instead has to pass on to the stomach for processing.

Please note: ***Anyone taking Prescription Medication should not use this water at the time of taking their medicine. The energized micro-clustered water will cause the medicine to disperse far faster than the drug company intended. Cease drinking alkaline water 30 minutes before taking oral medications and wait for another 30-45 minutes after to begin drinking the alkaline water again.***
